Fig. 1

Introduction:

This tool is intended for inserting the double-lock plate into the AMP waterproof connector housing. Read this instruction sheet carefully before you start operation.

1. Insertion of Double-Lock Plate

As shown in Fig. 1, select tool protrusion for number of position and insert it until the clearance between the tool and the housing edge disappears.

There is an indication on the tool surface at what point it must be used for number of position.

2. Handling Care:

This tool is designed for the purpose of inserting the double-lock plate into the above housing, and shall not be used for other purposes.

Special care shall be taken for not damaging the protrusion.
