

POWER SOLUTIONS GUIDE

EQUIPPED FOR THE FUTURE

TE Connectivity has a broad power connector portfolio including busbar power distribution, power supply interconnects, wire-to-board and backplane power solutions. We offer a variety of options for both low and high-power applications, with some solutions capable of carrying up to 500A. Our large portfolio can help enable end-to-end connectivity in your design with high performance products. A large manufacturing footprint can allow us to deliver consistent and high-quality products for fast design cycles on a global scale. We have an experienced engineering team that helps drive innovation through new types of designs and applications.

APPLICATIONS:

Base Stations

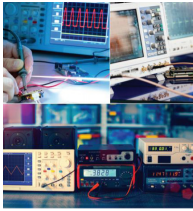

Data Centers

Data Center Switching & Routers

Data Center Storage

Test and Measurement

UAV/Drones

Remote Radio Units (RRU)

Electric Car Charging Stations

PRODUCT FAMILIES:

Internal Power

KEY APPLICATIONS

Storage, Router, Switch, Server, Base Station, Data Center, Backplane, Mezzanine, Co-Planar

Power Supply

KEY APPLICATIONS

All power supply interconnects including board-to-board, cable-to-board, cable-to-cable

Power Distribution

KEY APPLICATIONS

Any Point-to-Point or Multi-point distribution of power within a system over a cable or busbar

Quick Connect Power

KEY APPLICATIONS

Control system, battery, EV, industry, military, sport devices
