

LUMAWISE TYPE Z LED HOLDERS

TE Connectivity's (TE) LUMAWISE Type Z LED Holders provide a quick and easy solderless connection to Chip-on-Board (CoB) LED arrays and are designed to enable customers to develop Zhaga compliant modules. Standard and low-profile Type Z50 LED holders feature snap-in LED retention that secures the LED in the holder during assembly and establishes proper positioning in the fixture. Offered with or without the optic attachment features, the Type Z LED holders are available in a configuration to suit your needs. The optics attachment version functions with LEDiL optics to provide the lighting designer with beam shaping flexibility in spot and downlight applications.

APPLICATIONS

- Spot Lights
- Track Lights
- Recessed Downlights
