

Tab Contacts

for the Automotive Industry

INNOVATIVE TECHNOLOGIES

TE Connectivity (TE) is a leader in automotive connectivity and sensor technology. Our engineers are always working to meet complex requirements. We connect nearly every electronic function in the vehicle - from alternative power systems to infotainment and sensor technologies. Our technologies withstand harsh environments and tolerate high temperature, vibration, shock, pressure and long-life in electronic control systems.

INTERCONNECTION SYSTEMS

Our electrical and electronic interconnection products and solutions are used to electrically and mechanically connect wires and cables, printed circuit boards, integrated circuit packages, batteries and more.

CABLE ASSEMBLIES

TE is your partner for vehicle-specific cable assemblies. We offer research and development capabilities, prototypes and samples, as well as manufacturing facilities.

HYBRID & ELECTRIC MOBILITY SOLUTIONS

Our technologies leverage decades of innovation and experience with high-voltage transmission and distribution. Our hybrid and electric mobility solutions include a complete line of connectors, terminals, sensors, cable assemblies, contactors, and battery connection protection to help safeguard the flow of power in hybrid and electric vehicles. Connection after connection, you can count on TE for smaller, greener, lighter and smarter solutions you can trust.

SENSOR SOLUTIONS

Data is critical for making vehicles safer, greener, smarter and more connected. Customers rely on our sensor technology to provide data for control, adaptation and response of vehicle functions and features that increase safety, comfort, efficiency, and more. We collaborate to provide solutions for demanding and harsh applications such as automated transmissions, engines, chassis, clutch, brake and exhaust. Our products can be found in vehicles traveling the world's roads and highways.

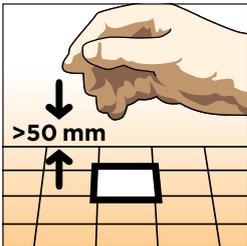

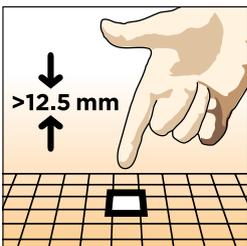

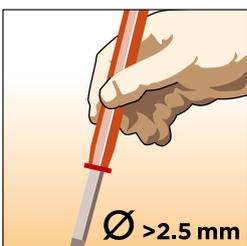

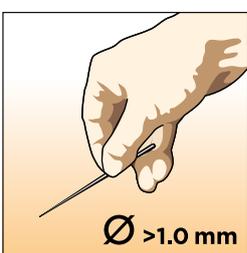

INFOTAINMENT

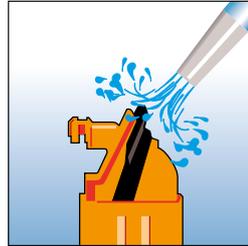

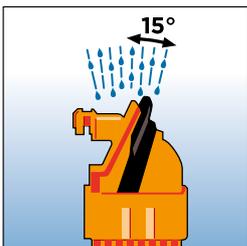

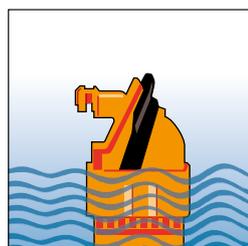

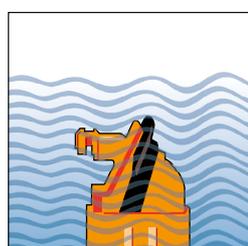

Our wide range of infotainment solutions are ideal for consumer port connections, high data rate applications, next-generation harness architecture, board-to-board connections and vehicle-to-vehicle communication.

RELAYS

From passenger comfort and infotainment to higher DC voltages and power levels to harsh environments, our relays and contactors provide critical switching functions in multiple vehicle applications. With increased contact gaps and other key design features, our relays are ideal for harsh environments such as shock and vibration.

1st Digit Against Foreign Objects (incl. Dust)	1st Digit Against Foreign Objects (incl. Dust)
<p>0</p>  <p>Not protected.</p>	<p>5K</p>  <p>Dust protected.</p>
<p>1</p>  <p>Protected against solid objects greater than 50 mm (ex. back of hand).</p>	<p>6K</p>  <p>Dust tight.</p>
<p>2</p>  <p>Protected against solid objects greater than 12.5 mm (ex. finger).</p>	
<p>3</p>  <p>Protected against solid objects greater than 2.5 mm (ex. tool).</p>	
<p>4</p>  <p>Protected against solid objects greater than 1.0 mm (ex. wire).</p>	

2nd Digit	Against Water	2nd Digit	Against Water
0	 <p>Not protected.</p>	5	 <p>Protected against jetting water.</p>
1	 <p>Protected against vertically dripping water.</p>	6	 <p>Protected against powerfully jetting water.</p>
2	 <p>Protected against dripping water when tilted up to 15°.</p>	6K	 <p>Protected against powerfully jetting water with increased pressure (Automotive).</p>
3	 <p>Protected against spraying water (up to 60° inclination).</p>	7	 <p>Protected against the temporary effects of immersion up to 1 meter.</p>
4	 <p>Protected against splashing water.</p>	8	 <p>Protected against continuous submersion agreed with customer, but more severe than code 7.</p>
4K	 <p>Protected against splashing water with increased pressure.</p>	9K	 <p>Protected against high-pressure/steam-jet cleaning (Automotive).</p>

Good Crimp Quality

<p>Bellmouth permissible</p> <p>Bellmouth must always be present</p> <p>Cut-off tab present</p>	<p>F-CRIMP</p>	<p>Crimp barrel closed Insulation is securely held</p>
<p>Insulation visible</p> <p>Conductor visible</p> <p>Locking lances and terminal body not deformed</p>	<p>OVERLAP CRIMP</p>	<p>Crimp legs overlap Insulation is securely held</p>
<p>Anvil imprint symmetrical</p>	<p>WRAP OVER CRIMP</p>	<p>Crimp legs must pass each other Insulation is securely held</p>
<p>Correct selection</p> <p>of wire, terminal and applicator Crimp barrel is closed, legs support each other, sufficient gap between legs and bottom of crimp, all strands are equally distributed and deformed</p>		

Test

WIRE CRIMP

Crimp heights and tolerances

For crimp height tolerances for any given contact, please refer to the relevant application specification.

Examples

Contact	P/N	Wire Range	Tolerance	Spec.
JJPT	927775	0.50-1.00 mm ²	±0.05 mm	114-18050
JPT	927773	1.50-2.50 mm ²	±0.05 mm	114-18050
MQS	962885	0.20-0.50 mm ²	±0.03 mm	114-18025

INSULATION CRIMP

Wire crimp without conductor

Insulation must be securely held after bend test (one bend cycle)

WIRE CRIMP

Digital crimp height micrometer (0.001 mm increments) according to DIN ISO 9001
Part number: 547203-1

Incorrect Crimp Quality

<p>Terminal body damaged</p>	<p>F-CRIMP</p>	<p>Crimp legs are not closed</p> <p>Insulation is pierced</p>
<p>Single core crimped on terminal</p>	<p>INSULATION CRIMP OVERLAP CRIMP</p>	<p>Crimp legs do not overlap</p> <p>Insulation is pierced</p>
<p>Terminal twisted</p>	<p>WRAP OVER CRIMP</p>	<p>Insulation is not securely held</p> <p>Insulation is over crimped</p>
<p>Cut off tab too long</p>	<p>Conductor brush protrudes into terminal body</p> <p>Insulation inside the wire crimp</p>	
<p>Crimp barrel distorted</p>	<p>Wire bent</p>	
<p>Terminal bent</p>	<p>Terminal bent</p>	

Correct
Incorrect
Test

At TE Connectivity, we support your RoHS requirements. We've assessed more than 1.5 million end items/components for RoHS compliance, and issued new part numbers where any change was required to eliminate the restricted materials. Part numbers in this catalog are identified as:

RoHS Compliant

Part numbers in this catalog are RoHS Compliant, unless marked otherwise. These products comply with European Union Directive 2002/95/EC as amended 1 January 2006 that restricts the use of lead, mercury, cadmium, hexavalent chromium, PBB, and PBDE in certain electrical and electronic products sold into the EU as of 1 July 2006.

Note: For purposes of this Catalog, included within the definition of RoHS Compliant are products that are clearly "Out of Scope" of the RoHS Directive such as hand tools and other non-electrical accessories.

Non-RoHS Compliant

These part numbers are identified with a "t" symbol. These products do not comply with the material restrictions of the European Union Directive 2002/95/EC.

5 of 6 Compliant

A "l" symbol identifies these part numbers. These products do not fully comply with the European Union Directive 2002/95/EC because they contain lead in solderable interfaces (they do not contain any of the other five restricted substances above allowable limits). However, these products may be suitable for use in RoHS applications where there is an application-based exception for lead in solders, such as the server, storage, or networking infrastructure exemption.

Note: Information regarding RoHS compliance is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information provided by our suppliers. This information is subject to change. For latest compliance status, refer to our website referenced below. So whatever your questions when it comes to RoHS, we've got the answers at <http://www.TE.com/customersupport/rohssupportcenter/>

Getting the information you need

Our comprehensive on-line RoHS Customer Support Center provides a forum to answer your questions and support your RoHS needs. A RoHS FAQ (Frequently Asked Questions) is available with links to more detailed information. You can also submit RoHS questions and receive a response within 24 hours during a normal work week. The Support Center also provides:

- Cross-Reference from Non-compliant to Compliant Products
- Ability to browse RoHS Compliant Products in our on-line catalog:
www.TE.com/commerce/alt/RohsAltHome.do
- Downloadable Technical Data Customer Information Presentation
- More detailed information regarding the definitions used above

Tab Contacts

for the Automotive Industry

INTRODUCTION

Every day, engineers around the world are challenged to find connectivity solutions for either wire-to-wire or wire-to-board applications.

These solutions are driven by key terminal characteristics such as wire size, ambient temperature, processing temperature, space requirements. Therefore the tab dimension is decisive for secure connection.

At TE Connectivity, we have created the following pages to support market requirements and offer engineers the best possible solutions. Finding the correct tab is fundamental to securing enhanced and robust connectivity.

We have a broad portfolio of tab products. The following pages provide you with over 260 products among 14 different dimensions with synergistic links leading you to the product family to solve your connection problem with best possible combination.

For further assistance please contact your TE Sales Engineer.

PLEASE NOTE

The current carrying capacity provided on the following pages is for information only. Please refer to the related product specification for detailed information.

APPLICATION TOOLING

To get the correct applicator version (dash no.) and/or where a terminal and applicator is to be used on a seal-stripper-crimper terminator, please contact your local TE Connectivity representative for clarification of applicator requirements.

Hand Tools are designed for loose piece terminals only! Please contact your local TE Connectivity representative to identify the correct loose piece terminals. Standard extraction tool is an option for standard applications. The right one is depending of the assembly of the contacts and housing.

Special installation of the applicator (e.g. into a stripper seal crimp terminating unit) or special requirements about the wire crimp width (e.g. crimp width .050) have to be clarified individually. Please contact the Tooling Assistance Center (TAC-EMEA@te.com).

Tab Contacts for the Automotive Industry

0.50 mm Tab Contacts

Standard Contacts with 0.50 mm Tab Width

Technical Features

Contact Material

CuSn

Surface Contact Area

Tin plated

Silver plated

Wire Size Range

0.13 – 0.35 mm²

Current Carrying Capacity

Up to 3 A at 90 °C

Temperature Range

–40 °C ... +105 °C (tin plated)

–40 °C ... +170 °C (silver plated)

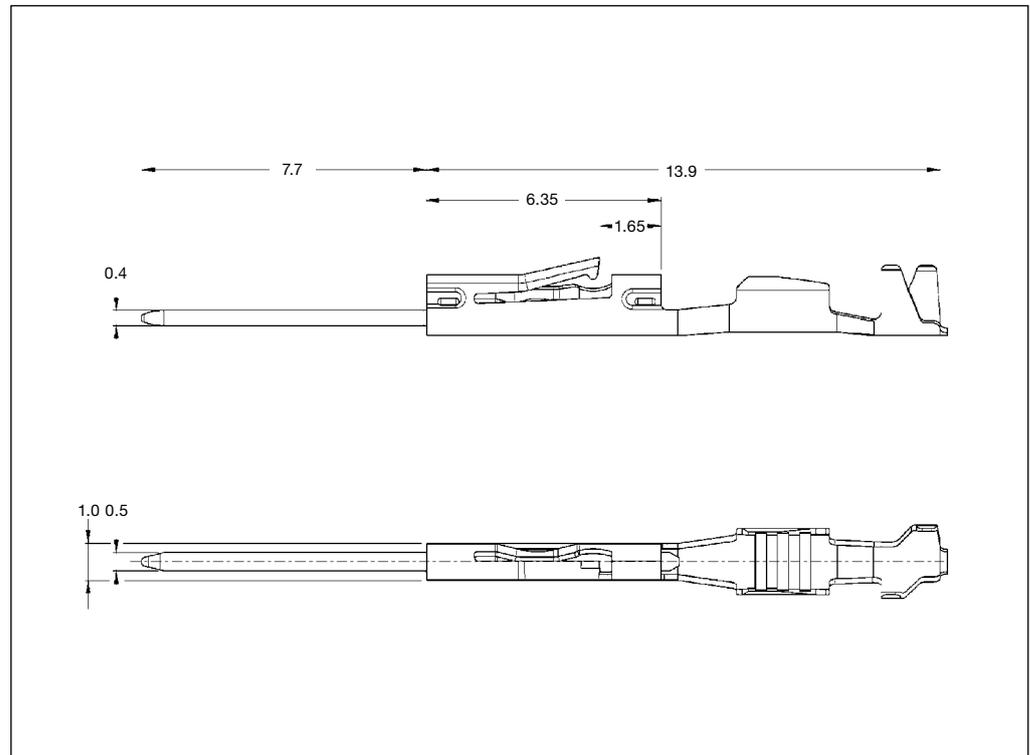

Cycles

20 tin plated

50 silver plated

Standard Contacts with 1.2 mm Tab Width

Technical Features

Contact Material

CuSn, CuNiSi

Contact Finish

Pre-tin plated, silver plated
or gold plated

Wire Size Range

0.13 - 1.50 mm²

Current Carrying Capacity:

Up to 18 A at 80 °C

Temperature Range

-40 °C ... +130 °C (tin plated)
-40 °C ... +140 °C (silver plated)
-40 °C ... +150 °C (gold plated)

Mating Cycles

10 tin plated
20 silver plated
25 gold plated

Contact Dimension

0.63 x 1.20 mm

Extraction Tool
see table below

Technical Features

Contact Material

CuSn, CuSn4 or CuFe2

Contact Finish

Pre-tin plated, silver plated or gold plated

Wire Size Range

0.35 – 4.00 mm²

Current Carrying Capacity

Up to 30 A at 90 °C

Temperature Range

-40 °C ... +130 °C (tin plated)
-40 °C ... +140 °C (silver plated)
-40 °C ... +150 °C (gold plated)

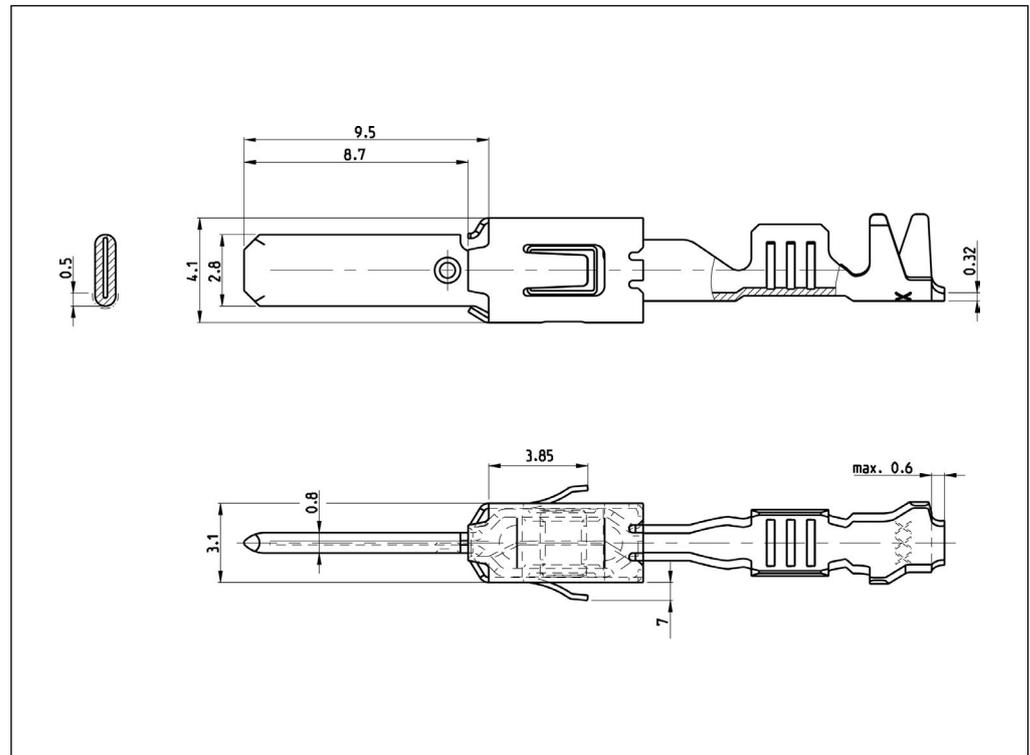

Mating Cycles

10 tin plated
50 silver plated
100 gold plated

Contact Thickness

0.80 x 2.80 mm

Contacts with Single Wire Sealing System with 2.8 mm Tab Width

Extraction Force
min. 1.5 N

Extraction Tool
see table below

Technical Features

Contact Material

CuNiSi and CuFe2

Contact Finish

Pre-tin plated, silver plated or gold plated

Wire Size Range

0.2 - 4.0 mm²

Current Carrying Capacity

Up to 40 A max at 40 °C

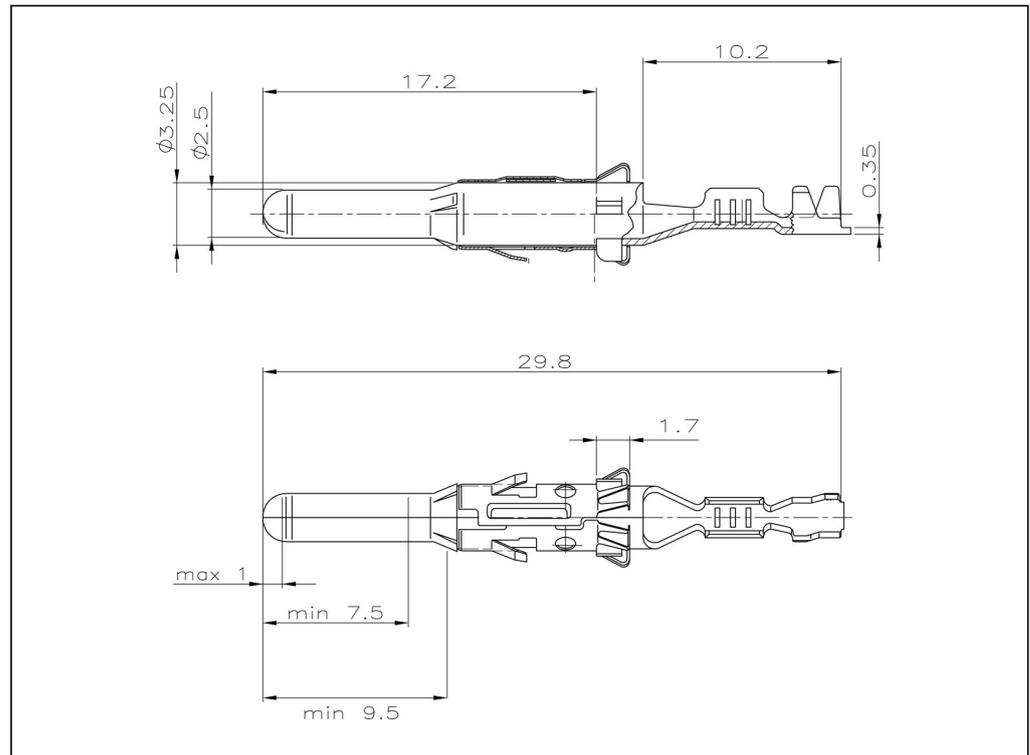

Temperature Range

-40 °C ... +130 °C (tin plated)
-40 °C ... +140 °C (silver plated)
-40 °C ... +150 °C (gold plated)

Mating Cycles

10 tin plated
50 silver plated
100 gold plated

Standard Contacts with 2.5 mm Round Tab

Extraction Tool
1-1579007-8

Product Group Drawing
1355064

Product Specification
108-18027

Application Specification
114-18020

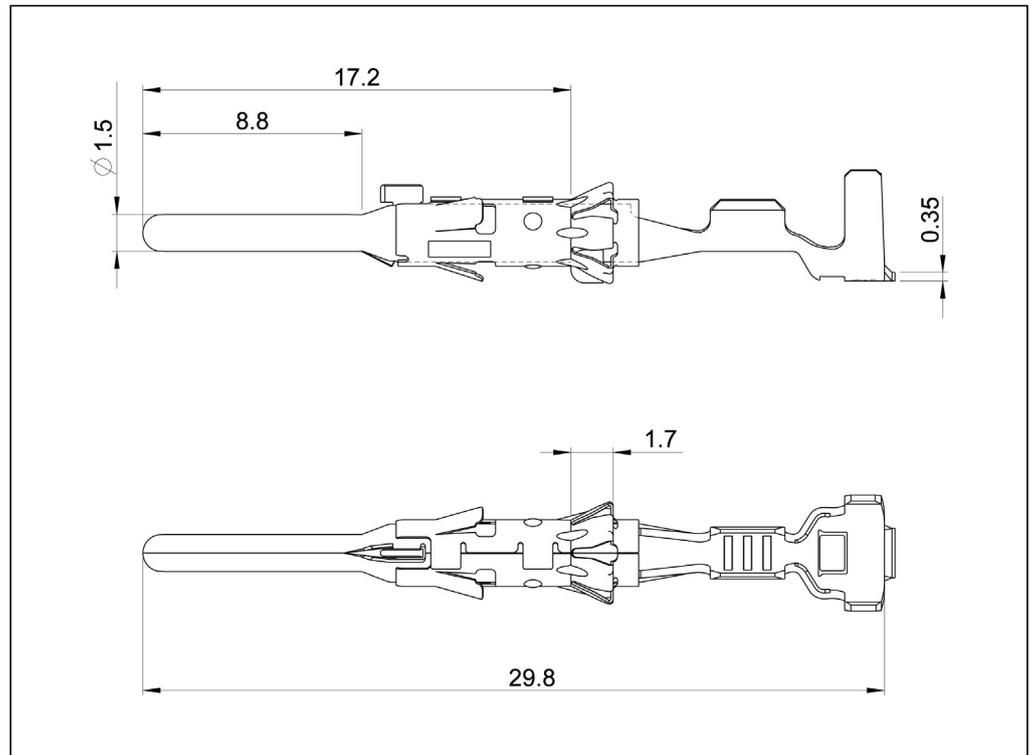

Standard Contacts with 2.5 mm Round Tab

APPLICATION TOOLING AND EQUIPMENT

INTRODUCTION

TE Application Tooling is dedicated to providing high quality equipment options to meet all levels of our connector products specifications. We are also able to provide a broad range of equipment for other manufacturer's products.

Our equipment range is vast and almost unmatched by others operating in the same industry segments, as is our global presence and support network in the form of field service engineers and product managers. We supply everything from simple hand tools to the most complex automated systems.

Equipment is segregated into two types and managed accordingly:

Generic equipment

Where we can supply you with sufficient information referenced by Part Number such that you can identify and order what you need yourself.

Specialised Equipment

Where you will need help from our specialist product managers to identify what's just right for your Application.

Finding Equipment Online

www.tooling.te.com

- Powerful searches to find generic equipment options (Hand Tools / Applicators)
- Brochures and more detailed flyers for the specialised equipment.
- It's quick, easy and more importantly the latest and most up to date information is available online.

Regional Assistance

www.te.com/support-center
