

# INNOVATIVE PRODUCTS FOR ENGINE AND VEHICLE APPLICATIONS

When every connection counts, TE delivers reliable connectivity products designed to withstand harsh environmental conditions for on and off-highway vehicles and recreational transportation. As a world leader in rough and rugged connectivity, you can depend on TE to provide innovative solutions for field applications where failure is not an option.

TE's sensors provide data in harsh conditions with a high degree of accuracy and reliability for commercial trucks, agricultural and construction vehicles, diesel generators and marine equipment. The demands placed on modern engines to provide maximum performance and fuel economy coupled with the drive to reduce emissions, requires an increasing number of sensors to monitor and help manage engine operation.

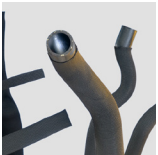

## AMPLIVAR TERMINALS & SPLICES

Produce a superior metal-to-metal compression crimp with excellent tensile strength and conductivity

## RAYBLOCK HEAT SHRINK SEALING KITS

Environmentally seals cable bundles and the back of connectors while providing strain relief

## HFT5000 HEAT SHRINK TUBING

Suppress noise and protect hoses, pipes and wiring bundles from mechanical abrasion, chafing and cutting with heat-shrinkable fabric tubing

## SINGLE WALL FLAME RETARDANT (SWFR) TUBING

Enable electrical insulation and mechanical protection with halogen-free, UL-VW 1 rated irradiated polyolefin tubing

## MAG-MATE TERMINALS

Produce stable, gas-tight electrical magnet wire terminations free of oxides and other contaminants with clean metal-to-metal interface
