

TAT-125 SERIES HEAT SHRINK TUBING

TAT-125 is especially suitable for applications where the moisture seal must withstand flexing or other physical abuse. Because both tubing and adhesive are flexible, the moisture seal is resistant to bending of the substrate. The thin adhesive lining of TAT-125 melts and flows with the heat of application to form a positive environmental seal. The adhesive will adhere to a wide variety of plastics, rubbers, and metals, including PVC, polyethylene, neoprene, lead, and steel.

The MIL-Spec versions of these products are temporarily unavailable, but we have equivalent, non-MIL-Spec parts available that can be ordered.
